DIVEK S

Full stack JS developer
Note: I have Nice UI friendly website portfolio of [here](#)

PROFILE

I love web technologies. I can quickly adapt to fast-paced work settings. Passionate about striving with a knack to learn continuously and go higher in software development. Currently working as a full-stack developer at Siemens technology. I am good at end-to-end project delivery, which aggregates frontend, backend, serverless application, proof of concepts, R and D, testing and dev ops, of tech stacks. Earlier I was working in Zibtek as a full-stack developer in technologies like web, mobile, and dev-ops, and back in 2014, I was professionally freelancing mobile and web apps on my own for 4 years, which loads me up with experience in developing reliable modern applications, I have also worked as customer service, cash goods control in F and B industries part-time during my college days.

PROJECTS

Emobility EVC3 (Web)
Charger Analysis (Web)
PetNetX (Web and Mobile)
Tipster (Web and Mobile)
Fortify (Web and Mobile)
Dental Warranty (Web)
Legacy Foundation (Web and Mobile)
OnCourse (Web and Mobile)
Statix (Web and Mobile)
